

PulseEDU Demo Run-Books

Presenter-ready scripts for demoing PulseEDU. Each file is **one feature track** — what to say, **which account to log in as**, and **exactly which screens, teachers, and student rows to point at**. Written to work for **both** a sales pitch and internal staff onboarding.

Format mirrors `docs/hall-pass-demo-runbook.md` (the full Hall Pass setup guide). The files here are the **demo scripts**; that runbook is the deep setup/equipment reference for the kiosk.

The tracks

#	Track	File	One-liner
1	Hall Pass	hall-pass-demo.md	Paperless self-serve passes + digital line.
2	PBIS + Attendance	pbis-attendance-demo.md	Houses, Spotlight, Invisible Student, On-Time "arrive-in-time" rewards , tardies.
3	School Tours CRM	school-tours-crm-demo.md	Full enrollment-lead pipeline with owner accountability .
4	AST	ast-demo.md	Staff time-bank ledger with admin-confirmed credits.
5	Teacher Roster (deep dive)	teacher-roster-demo.md	The centerpiece — the whole child on one screen.
6	Insights Hub	insights-hub-demo.md	Six dashboards, filters, drill-down to the student.
7	HeartBEAT to families	parent-heartbeat-demo.md	The weekly family update, automatically.

The "weekly HeartBEAT to families" thread

This runs through **every** track. Almost everything you demo — PBIS points, hall passes, tardies, on-time streaks, accommodations, staff notes — flows into the **Parent Portal** and is mailed home as a **Weekly HeartBEAT email** (a PDF snapshot). Whenever you land a feature, add the one-line close: "...and the family sees this in their weekly HeartBEAT." Track 7 shows the family side end-to-end.

Shared setup (read once)

The demo school

- **D. S. Parrott Middle** (`schoolId = 1`) has the richest seeded data — realistic FAST scores, accommodations, safety plans, PBIS history, tardies, tour leads. **Demo Parrott unless you have a reason not to.**

Accounts to drive from (seeded demo credentials)

Use it for	Name	Login	Password
Admin / Core-Team views (can switch schools)	Chris Clifford (SuperUser, Parrott)	<code>chris.clifford@hcsb.k12.fl.us</code>	<code>@Leopards</code>
Hall Pass demo (drive this teacher's room)	Amy Brown — Math G7 (Parrott)	<code>amy.brown@pulsedemo.com</code>	<code>PulseDemo26</code>
Teacher Roster deep-dive teacher	Pamela Martin — ELA G7 (Parrott)	<code>pamela.martin@pulsedemo.com</code>	<code>PulseDemo26</code>
Generic FAST teacher (fallback)	Demo Teacher (Parrott)	<code>demo.fast.teacher@dsparrott.test</code>	(seed default)
A second district/ school	Brandon Wright (SuperUser, Springstead)	<code>brandon.wright@hcsb.k12.fl.us</code>	<code>@GoEagles</code>
Plain admin examples	Brad Merschbach / Ed LaRose / et al.	<code>...@hcsb.k12.fl.us</code>	<code>PulseDemo!</code>

Featured teachers for this demo set (per your setup): drive **Hall Pass** with **Amy Brown - Math G7** (her students' badges are printed) and the **Teacher Roster** deep-dive with **Pamela Martin - ELA G7**. Both are plain teachers at Parrott, so they also show the teacher's-eye (not admin) view. Either log in as them directly, or — to skip passwords and show off a feature — drive as **Chris Clifford** (Core Team) and open their roster via the teacher picker.

These are **demo-seed** credentials (from `artifacts/api-server/src/seed.ts`), not real staff secrets. Use the **live published** domain for the demo, never the preview link.

People to point at (Parrott)

- **Vivian Warren** — ESE (Specific Learning Disability), Hispanic. Great for accommodations + equity.
- **Gianna James** — ESE (Other Health Impaired).

- **Frankie Flynn** — Gifted. Good for the high-flyer / growth story.
- **Tristan Lawson** — clean baseline (no flags) for the "normal student" path.

Always read the on-screen ID as the local SIS ID. PulseEDU never shows the state FLEID to anyone. If anyone asks "what's that long ID?" — it's internal-only and never displayed.

The four Houses

Falcon (Blue) · **Phoenix** (Red) · **Stag** (Green) · **Wolf** (Purple). Standings appear on the hallway signage at `.../signage/houses?schoolId=1`.

Make the room feel alive

- Open `.../signage/houses?schoolId=1` on a side screen. The ambient **"heartbeat"** drip keeps the action feed moving during the bell window. Admins can force one with the **"Fire heartbeat"** button on that page.
- Signage and dashboards poll roughly every **30 seconds** — give them a beat to update after you do something.

General presenter tips

- Navigate by **tile/nav label** (the app uses path-based screens; clicking is cleaner than typing URLs). Public URLs that are worth typing: `/kiosk`, `/parent`, `/tour/1`, `/signage/houses?schoolId=1`.
- If a feature screen is missing entirely, it's a **licensing/feature toggle** for that school — check the school's plan before blaming the build.
