

PulseEDU District Demo — Readiness Checklist

Run through this the day before and again 30 minutes before the demo. Demo data was seeded earlier (`artifacts/api-server/src/seedDemoExtras.ts`); this verifies it is present and the accounts work.

Demo school: D.S. Parrott Middle School (school_id 1)

Accounts to have ready

- [] **Demo Admin** (id 598) — district/admin walkthrough + AST/Comp Time approver + PulseDNA + Insights + ticketing.
- [] **Amy Brown** — Math, Grade 7. Hall Pass teacher view + Teacher Roster.
- [] **Pamela Martin** — ELA, Grade 7. Small groups + accommodations.
- [] A **Counselor / Core Team** login that can open HeartBEAT + MTSS plans.
- [] A user with `canManageTickets` for Event Ticketing (Demo Admin works).
- [] A **parent/guardian portal login** (or staff "preview as parent") for the Family HeartBEAT slide, ideally a family with **two siblings** so the sibling switcher is demonstrable.
- [] Know each password / have sessions pre-logged-in on the demo device.

Students to confirm (open each profile once)

- [] **Noah Xu** — flagged as an Invisible Student in HeartBEAT, with a real connection history.
- [] **Alina Maddox** — active Tier 3 **academic (ELA)** plan, ~2 months of entries.
- [] **Amelia Abbott** — active Tier 3 **academic (math)** plan, ~2 months.
- [] **Sienna Osborne** — active Tier 3 **academic (math)** plan, ~2 months.
- [] At least one student in **Amy Brown's** roster with a FAST learning-gain green-check and a visible ESE/504/ELL or safety flag.
- [] ~5 students with accommodations visible on **Pamela Martin's** roster.

Data to confirm

- [] **Bell schedule** marked as default for school 1 (so the Hall Pass queue resets per period — see onboarding note in `replit.md`).
- [] A **destination at/near capacity** so the waiting-line + Go Now flow is demonstrable (or be ready to enqueue students at the kiosk live).
- [] **PBIS House Cup** has standings so the signage shows real numbers (`/signage/houses?schoolId=1`).

- [] **MTSS Tier 3** plans show multiple weekly entries from more than one staff member (the timeline, not a single point).
- [] **AST / Comp Time** has at least one request to walk through approval; EST Comp Time balance exists for **Teresa Holloway** (id 795).
- [] **PulseDNA** Communication DNA profile is saved for the school so generated copy is in the school's voice.
- [] **Family HeartBEAT / Parent Portal**: the demo family's child shows real hall passes/ attendance, a **tardy with lost minutes**, FAST scores with next steps, an active intervention/ accommodation, and at least one **sent family message to acknowledge**.
- [] **Insights**: Algebra performance view populated; a student profile opens from a chart drill-down.
- [] **FAST Coverage Report** populated for Grade 7.
- [] A **demo event** exists in Event Ticketing with a QR ticket you can scan (and re-scan to show the duplicate block).

Devices & environment

- [] Demo device logged in to the staff app at `/` for school 1.
- [] A second device or the kiosk URL (`/kiosk`) for the Hall Pass demo.
- [] A phone/camera ready for the **ticket QR scan** (no-login scanner works).
- [] A screen/TV (or a browser tab) on `/signage/houses?schoolId=1` for signage.
- [] The deck open (PulseEDU District Demo) — `/allslides` for a quick walk, or `/slide1` to present in order.
- [] Test network: kiosk, signage, and scanner all reachable.

Verify the deck itself

- [] `pnpm --filter @workspace/pulseedu-district-demo run validate-slides` passes (16 slides).
- [] Embedded screenshots load on slides 3, 4, and 15.
- [] Walk slides 1 → 16 once; confirm each fits the 16:9 frame.

Supporting docs

- [] `district-demo-script.md` — presenter talking points, in hand.
- [] `district-demo-shot-list.md` — which gated screens to capture/demo live.
