

PulseEDU District Demo — Presenter Script

Demo school: D.S. Parrott Middle School (school_id 1) **Deck:** "PulseEDU District Demo" slides artifact (16 slides) **Through-line:** This is not a feature tour. It is one school day, shown end to end, across every audience — students, teachers, families, and administrators.

Each section below maps to a deck slide and pairs the talking points with the live action to take in the app. Screens marked **LIVE** are login-gated and must be demonstrated in the running app (see `district-demo-shot-list.md`). Screens marked **PUBLIC** are already embedded as screenshots in the deck.

Slide 1 — Title: "The operating system for your schools"

Open on the promise, not the product:

"Today you won't see eighteen disconnected tools. You'll see one platform — the same data following a student from the hallway, to the classroom, to the family's inbox, to your leadership dashboard. Everything is real data from D.S. Parrott Middle."

Set the expectation: eight stops, one school day.

Slide 2 — The demonstration flow

Walk the eight stops in ten seconds each. Plant the key idea: **they connect**. "The same badge scan that opens a hall pass also takes attendance and awards a behavior point. You'll see that in the first two minutes."

Section 1 — Student Experience

Slide 3 — Hall Pass & Kiosk (LIVE: kiosk + teacher queue)

- "A student needs to leave the room. No paper, no interrupting the teacher."
- **LIVE:** At the kiosk in Amy Brown's room, scan a student badge, choose a destination.
- Show a destination **at capacity** — the student joins a period-aware waiting line that resets on the bell.
- Switch to the teacher's **Companion Queue** and push a waiting student through with **Go Now**.
- Show the **live timer**, then the **return check-in**.
- Land it: "One action. The hallway is now accounted for."

Slide 4 — Attendance, PBIS & Tour (PUBLIC: tour page)

- "Here's the part most schools miss: that same scan did three things."
 - Attendance was marked. A PBIS point posted automatically. The pass is logged.
 - **PUBLIC:** Open the school tour page — "this is how a prospective family first meets D.S. Parrott, in English or Spanish, before they ever walk in."
-

Section 2 — Teacher Experience

Slide 5 — Teacher Roster (LIVE: Amy Brown's roster)

- "We just made the student's day easier. Now the teacher's."
- **LIVE:** Open **Amy Brown's Grade 7 Math** roster. Point at FAST benchmark color-coding, the bottom standards, and the ESE/504/ELL + safety flags.
- "This replaces a spreadsheet she used to keep by hand. And the Core Team sees the exact same roster — one source of truth."

Slide 6 — Small Groups & Accommodations (LIVE: Pamela Martin)

- **LIVE:** Group students by a shared weak standard, form a small group, and log a support session. Show the history building over time.
 - **LIVE:** Open **Pamela Martin's** accommodations for ~5 students in ELA.
 - "Compliance stops being a binder. It's in the daily workflow."
-

Section 3 — Student Support (the emotional center)

Slide 7 — HeartBEAT, the Invisible Student (LIVE: Noah Xu)

- Slow down. Say the line out loud:

"Every student should be known by someone."

- "Some students aren't failing and aren't in trouble — so no one's watching. They can go a whole year without one meaningful adult connection."
 - **LIVE:** Open **Noah Xu** — show the invisible-student flag and the connection history that explains why the system surfaced him.
 - "PulseEDU finds these students before the year slips by."
-

Section 4 — MTSS

Slide 8 — Tiered Interventions (LIVE: Tier 3 academic plans)

- "Intervention is only real if it's documented. Watch two months of it."
 - **LIVE:** Open a Tier 3 academic plan — **Alina Maddox (ELA)**, **Amelia Abbott (math)**, **Sienna Osborne (math)**. Show the timeline: multiple weeks, multiple staff, a progression of supports — not one snapshot.
-

Section 5 — AST & Comp Time

Slide 9 — Earned time, fully accounted (LIVE: approval workflow)

- "Staff time is a real budget line and a real grievance risk. Here's the audit trail."
 - **LIVE:** As **Demo Admin**, walk the five steps: submit → approve → complete → verify → bank. Show **EST Comp Time** banking for **Teresa Holloway**.
 - "Both AST and Comp Time, end to end, defensible at payroll."
-

Section 6 — Family Communication + PulseDNA AI (the wow moment)

Slide 10 — PulseDNA AI (LIVE: generate from a rough idea)

- "Every principal knows this problem: you have thirty seconds and a great moment to share, but no time to write it three ways."
- **LIVE:** Type the rough idea exactly:

"Volleyball team won tonight. Great crowd. Proud of our kids."

- Generate all three: **family message**, **social post**, **teleprompter script** — in the school's saved voice.
- Say the line:

"AI should not replace the principal's voice. It should learn the school's voice."

- If you have a before/after, show the generic AI version next to the DNA-trained version.

Slide 11 — Family HeartBEAT / Parent Portal (LIVE: a parent's own child)

- "If PulseDNA is the school's voice going out, this is the family's window coming in — the same HeartBEAT staff see, shared directly with the family."

- **LIVE:** Open the Parent Portal as a parent and walk one child's day: hall passes and attendance, **tardies and lost instructional minutes** (kept honest), **FAST scores with the next steps** that follow, and the **interventions and accommodations** in place.
 - Show an **important school message acknowledged in one tap**.
 - Note **sibling switching**, configurable section visibility, and **PDF export** — one secure, per-student record for the family.
-

Section 7 — Leadership Intelligence

Slide 12 — Insights Hub (**LIVE: Algebra readiness → student drill-down**)

- Say the line:

"Data should not simply tell us what happened. It should guide what we do next."

- **LIVE:** Open Algebra performance / readiness. Then **drill from a chart into a single student profile** to prove it's not just a dashboard.

Slide 13 — FAST Coverage Report (**LIVE: gaps by standard**)

- "Scores tell you how students did. Coverage tells you whether they were even taught what the test measures."
 - **LIVE:** Show standards analyzed, % curriculum taught, and instructional gaps for Grade 7 — surfaced early enough to act on.
-

Section 8 — School Operations

Slide 14 — Event Ticketing (**LIVE: create + double-scan**)

- **LIVE:** Create an event with a per-grade quota. Show a QR ticket. Then **scan the same ticket twice** to show the first-scan-wins duplicate block.
- "No cash box, no clipboard, no double entry."

Slide 15 — Digital Signage (**PUBLIC: live House Cup**)

- **PUBLIC:** Show the live PBIS House Cup signage (embedded). Mention the remote that drives every TV on a playlist without re-entering URLs.
 - "School culture, made visible on every screen."
-

Slide 16 — The thesis (close)

Land it verbatim:

"PulseEDU is not another software product. It is the operating system that connects students, teachers, families, and administrators into a single, actionable platform."

Tie back: "One platform. Every adult in the building. One school day — the one you just watched."

Timing guide (~22-25 min)

Section	Slides	Target
Open + flow	1-2	2 min
Student Experience	3-4	4 min
Teacher Experience	5-6	4 min
Student Support	7	2 min
MTSS	8	3 min
AST & Comp Time	9	2 min
Family + PulseDNA	10-11	4 min
Leadership	12-13	3 min
School Ops	14-15	2 min
Close	16	1 min
