

⚡ THE NEXT GENERATION OF EDTECH

The true HeartBEAT of your school.

One unified platform for school operations, behavior & PBIS, MTSS and academics, family engagement, and district-wide insights — purpose-built for K-12 schools.

Daily Operations

Behavior & PBIS

MTSS & Academics

Family Engagement

District Insights

FERPA & COPPA Aligned

Every system your school runs on, beating as one.

Schools juggle a dozen disconnected tools — one for hall passes, another for behavior points, spreadsheets for interventions, and email for families.

PulseEDU replaces the chaos with a single, multi-tenant platform where operations, student support, and data live together. Less friction for staff, more time for students, and a clear, real-time picture for leadership.

16+

Integrated modules in one login

6

Insight dashboards with drill-down

K-12

Multi-school, district-ready by design

100%

School-scoped data isolation

Built for the people who run schools

For Teachers

Fewer clicks, fewer tabs. Rosters, behavior, hall passes, and intervention check-ins surface exactly when needed — with bell-driven reminders.

For Support Teams

Counselors, MTSS, and behavior specialists work from shared plans, audit trails, and safety information with role-based access.

For Administrators

Live visibility into climate, attendance friction, MTSS fidelity, and early-warning signals — without chasing reports.

For Families

A secure parent portal and bilingual school communications keep guardians informed and engaged in their student's journey.

Daily Operations

Run the building, not the chaos. The everyday logistics of a school — movement, arrival, dismissal, events, and what's on every screen — handled in one place.

Hall Pass & Kiosk

A self-serve door kiosk with a period-aware **waiting line** (caps reset on the bell) and a **“Go Now”** skip-the-line for students summoned to the office, guidance, or clinic. Keep-apart & daily-limit safety blocks, a teacher Companion Queue with a live **“heading to me”** view, and printable activation cards & badges.

MOVEMENT & SAFETY

Eligibility Hub

Attendance- and tardy-driven participation eligibility for **athletics, clubs, and activities**. Managers run activities, rosters, coaches, and uploads; assigned coaches get a **read-only** view of their own teams — with a weekly eligibility digest and per-student parent notes.

ATHLETICS & ACTIVITIES

School Tours & Enrollment

A public, bilingual (EN/ES) per-school brag page with a tour-request lead pipeline — owners, timelines, overdue clocks, a conversion report, and brag-sheet & post-tour PDFs to win families.

ENROLLMENT

Event Ticketing

Free-ticket events with per-grade quotas, QR tickets delivered by email, PDF, and the parent portal, no-login volunteer scanning with atomic first-scan-wins, capacity caps, and a full scan-history audit.

EVENTS

Digital Displays & Signage

Per-school playlists (image, video, audio, PDF) with scheduling, PBIS house standings, active hall passes, and HeartBEAT signage — plus **Live Remote Control** to drive every TV PowerPoint-style without re-entering URLs.

COMMUNICATION

Bell Schedules & Tardy

Configurable bell schedules power period-aware queue resets, MTSS check-in windows, and notifications — the heartbeat clock the rest of the platform runs on.

SCHEDULING

Behavior & PBIS

Build the culture you want to see. Recognize the positive, support the struggling, and keep everyone safe — with the records and fairness controls schools need.

PBIS Hub & Store

Point tracking and student recognition with two reward catalogs: a teacher-run Classroom Store and a school-wide School Store (read-only for teachers, full edit for admins & PBIS coordinators).

POSITIVE BEHAVIOR

Spotlight Recognition

A governed, quartile-tiered random recognition engine that keeps house races competitive — the value a teacher sees is exactly the value stored, with re-spin protection when standings shift.

ENGAGEMENT

House System

School-wide house standings that surface on classroom and hallway signage, turning everyday positive behavior into a shared, school-spirited competition.

CLIMATE

Safety Plans

Per-student behavioral and physical safety checklists built from a reusable library, with full audit logs and role-based access — Guidance & Core Team edit, all staff view what they need.

STUDENT SAFETY

Behavior Documentation

Consistent logging of incidents and supports tied to each student, feeding the Behavior and Equity dashboards so patterns surface early and interventions are timely.

RECORDS

Consistency Guardrails

Built-in checks help Core Teams apply behavior responses fairly and consistently across staff — supporting equitable, defensible decisions.

EQUITY

MTSS, Academics & Early Warning

Catch every student before they fall. Tiered intervention, FAST-driven academics, and data that points the way — without the spreadsheet sprawl.

MTSS Intervention Plans

Behavior & Academic Tier 2/3 tracking — goal setting, weekly progress monitoring, strategy categories, completion reports, and bell-driven check-ins. A dual-gate engine surfaces Tier 3 academic candidates from FAST & iReady evidence.

MULTI-TIERED SUPPORT

Teacher Roster

A per-teacher student view with FAST scores, ESE/504/ELL flags, safety-plan indicators, and the FAST learning-gain green-check. Core Team can view any teacher's roster.

CLASSROOM INSIGHT

Intensive Group Insights

A read-only Class Composer proposes intensive-group sections from FAST item-level weakness, plus a Group Insights tab — never overwriting your SIS, which stays the source of truth.

GROUPING

School Grade Calculator

An admin estimate of the Florida MS school grade per progress-monitoring window — FAST components auto-computed, learning gains projected at PM1/PM2 and strict PM3-to-PM3 at PM3.

ACCOUNTABILITY

Multi-Year FAST History

Longitudinal trajectory chips on the student profile, teacher roster, and MTSS plan editor — giving every decision the context of where a student has been, not just where they are.

GROWTH

Early Warning

An early-warning dashboard blends attendance friction, behavior, and academic signals to flag students who need attention now — with one-click drill-down to the full student profile.

PREVENTION

Insights, Data & Family

Decisions backed by data — and families brought into the loop. Turn everything your school records into clear pictures, and share the right parts with guardians.

Insights Dashboards

Engagement, Behavior, Academics, SEB/SEL, Equity, and Early Warning — aggregates, trends, top-N, grade and window filters, demographic disaggregation, and drill-down straight to a student's profile.

ANALYTICS

Parent Pick-Up

A curb keypad and walker gate, admin-authorized QR car tags with printable PDFs, a classroom signage tile, and an Admin Hub “still on campus” reconciliation view for safe, orderly dismissal.

ARRIVAL & DISMISSAL

Parent Portal

A secure mobile portal for a student's HeartBEAT — PBIS, hall passes, tardies with **lost-instruction minutes**, FAST scores, accommodations, and staff notes — with admin invites, sibling switching, configurable visibility, and PDF export.

FAMILY ACCESS

Family HeartBEAT & Messaging

Core-Team broadcasts — whole-school, by grade, by house, or by list — land in the parent portal inbox with an email nudge, as text **or recorded video**. Sent → Reached → Got-it counters close the loop, and a derived **Power Reader** badge recognizes engaged families.

ENGAGEMENT

PulseDNA Studio

A saved per-school **communication DNA** profile teaches the built-in AI your school's voice, then drafts family messages on demand — with an in-app **video recording studio** and teleprompter for principals to record a personal HeartBEAT message in minutes.

AI & VOICE

District, Multi-School & Branding

Multi-tenant by design: a district-wide SuperUser role spans schools while every other role stays school-scoped — and each school carries its own colors, logo, and signage identity. One platform, many schools, each feeling like its own.

DISTRICT-READY

Vetted, protected, and built for student privacy.

PulseEDU is engineered from the ground up to support **FERPA** and **COPPA** compliance. Student data is treated as what it is — protected educational information — with isolation, access controls, and audit trails at the core of the architecture, not bolted on afterward.

FERPA

FAMILY EDUCATIONAL RIGHTS & PRIVACY ACT

- ✓ Education records are restricted by strict, role-based access — staff see only what their role permits.
- ✓ Guardian access is limited to their own student(s) through verified, admin-issued portal invites.
- ✓ Sensitive actions are recorded in audit logs, supporting accountability and records requests.
- ✓ Student data is not sold and is used to deliver the school's educational services.

COPPA

CHILDREN'S ONLINE PRIVACY PROTECTION ACT

- ✓ Designed for the school-authorized consent model for K-12, acting on the district's behalf.
- ✓ Configurable consent and visibility controls let districts govern what is shared, in line with their policies.
- ✓ No third-party advertising and no behavioral ad tracking of students.
- ✓ Data collection is focused on what is needed to serve students and run school operations.

Tenant Isolation

Records are school-scoped, keeping each school's data separated by tenant across core student records.

Secured Access

Role-based permissions and authenticated sessions gate access across the platform.

Protected Storage

Uploaded files are access-controlled with per-school ACLs and tenant-bound permissions.

Ready to bring the HeartBEAT to your district?

Let's schedule a walkthrough and a compliance review with your team.

Supports FERPA/COPPA-aligned district implementations; final compliance depends on district policies, configuration, and data-processing agreement terms.
